California Accidental Release Prevention (CalARP)

Screening, Disclaimer, and Deregistration Guidelines

These guidelines have been developed by the County of San Diego CUP to determine which facilities in San Diego County need to prepare a Federal Risk Management Plan, a California Risk Management Plan, or both.

Introduction

On January 31, 1994 the U.S. EPA promulgated a final rule under provisions of the Clean Air Act (CAA) Amendments section 112(r) for the prevention of accidental releases of hazardous substances. The rule establishes a list of chemicals and threshold quantities that identify facilities subject to subsequent accident prevention regulations. In October 1996 California passed Senate Bill 1889 now incorporated as Health & Safety Code, Sections 25531-25534.3. This bill established the merging of the federal and state programs for the prevention of accidental releases of regulated toxic and flammable substances. The Office of Emergency Services (OES) has adopted regulations to eliminate the need for two separate and distinct risk management programs. The incorporation of the federal and state requirements has been designated as the California Accidental Release Prevention Program (CalARP).

The San Diego County Department of Environmental Health, Hazardous Materials Division (HMD) is the Certified Unified Program Agency (CUPA) responsible for the implementation of the CalARP program in San Diego County. HMD screens facilities in San Diego County to determine those that are subject to the regulatory requirements.

I. SCOPE AND DEFINITIONS

Who is subject to CalARP regulations?

Any owner or operator of a stationary source that has more than a threshold quantity of a regulated substance in a process.

What is considered a stationary source?

A stationary source means any building, structures, equipment, installations, or substance emitting stationary activities which belong to the same industrial group, that are located on one or more contiguous properties, and that are under control of the same person (or persons under common control), and from which an accidental release may occur. A stationary source includes transportation containers that are no longer under active shipping papers and transportation containers connected to equipment at the stationary source for the purposes of temporary storage, loading, or unloading.

What is considered a process?

A process means any activity involving a regulated substance, including any use, storage, manufacturing, handling, or on-site movement of such substances, or combination of these activities. Any group of vessels that are interconnected, or separate vessels that are located such that a regulated substance could be involved in a potential release, is considered a single process. The owner or operator of the stationary source must make a reasonable determination as to whether two or more vessels may be involved in the same accident, or whether a release from one vessel may be anticipated to lead to a release from another. The owner/operator should document his decision as to whether the individual vessels do or do not constitute as single process.

SCOPE AND DEFINITIONS (continued)

What is a regulated substance?

A regulated substance means any substance listed in Section 2770.5 of Title 19 of the California Code of Regulations (19 CCR). This includes the federal list of toxic substances (Table 1), the federal list of flammable substances (Table 2) and the state list of toxic substances (Table 3).

What is a threshold quantity?

A threshold quantity means the quantity specified for a regulated substance listed in 19 CCR, Section 2770.5 and determined to be present at a stationary source.

II. SCREENING, DISCLAIMER, AND DEREGISTRATION PROCESS

A. Screening

How will the HMD determine if a facility is required to develop an RMP?

The HMD will determine if a facility is required to develop a RMP by using one or more the following screening steps:

1. Database review of hazardous materials inventory submitted by the facility.
2. Screening new businesses as they proceed through the AB3205 process.
3. Mailing a survey form to facilities requesting process related information.
4. Site visits to clarify process information if needed.

What will be the cost to each business for the screening process?

The HMD will charge businesses a review fee at the current Environmental Health Specialist hourly fee for all review time and site related involvement (Step 4 above) in the screening process. To find out the current rate, businesses may call the Hazardous Materials Duty Desk at 619-338-2231.

What do facilities need to complete and submit to HMD as part of the screening process?

Facilities must complete a screening form, HM-9223, for each regulated substance in every process onsite. Screening form is attached.

Who can businesses contact for assistance or additional information?

Additional information and assistance can be obtained by calling the CalARP Coordinator at 619-338-2453, or the CalARP Supervisor at 619-338-2472.

B. Disclaimer

If a facility has completed the CalARP screening process and determined that they are not required to complete an RMP, they are required to fill out a CalARP Regulated Substance Disclaimer form (HM-9221). By completing this form, the facility is certifying that they have properly screened their process and are not subject to the CalARP regulations.

C. Deregistration

If a facility's process using a regulated substance ever falls below the threshold quantity due to process modifications, reductions in the amounts of regulated substances used, or closure of the process, the facility must deregister from the CalARP Program. This will be accomplished by the facility completing the CalARP Deregistration form (HM-9221) and a site inspection by a member of the HMD.

CalARP Screening Worksheet Instructions

Complete one worksheet for each facility site:

I. Facility Owner/Operator Information

Facility Name: Enter the name of your facility (business name).

Permit #: This number is on your Unified Program Facility Permit (UPFP). It is site specific. If you do not know your UPFP number, leave this blank.

Facility Address: Enter the physical address of your facility; include the city and zip code.

Facility Mailing Address: Enter your mailing address. If the mailing address is the same as the site address, leave this section blank.

Contact: Enter the name of the person who should be contacted if additional information or clarification is required.

Phone Number: Enter the phone number of the contact person. Include area code.

II. Regulated Substances Onsite

Complete this section for each Regulated Substance you have in a process at or above the threshold quantity. Use the attached Regulated Substance Tables (1, 2, and 3) to determine if you have a regulated substance and corresponding threshold quantity. **Please Note:** Some toxic regulated substances appear on both Table 1 and Table 3. You must use the lowest threshold quantity when making your determination to report a regulated substance.

To determine if a mixture is at or above the threshold quantity, apply the following rules:

1. Exclude the material if the concentration of the regulated substance in the mixture is <1% by weight.
2. If the concentration of the regulated substance is a $\geq 1\%$ or greater by weight in the mixture, use the % weight to determine the amount of pounds that are present in the process. Exclude the toxic regulated substances if their partial pressure in the mixture is <10 mmHg.
3. Exclude flammables if the mixture does not have an NFPA flammability hazard rating of 4. This includes substances with a flash point below 22.8°C (73°F) or a boiling point below 37.8°C (100°F). Otherwise the entire weight of the flammable mixture must be treated as a regulated substance.

Regulated Substance: Enter the name of the regulated substance from either Table 1, 2, or 3.

CAS #: Enter the Chemical Abstract Number (CAS#) for the regulated substance from either Table 1, 2, or 3.

Clean Air Act Title V Permit: State and local operating permit programs are required under Title V of the Clean Air Act (40 CFR Part 70). Check the "Yes" box if you are required by the Air Pollution Control District to comply with the Title V requirements of the Clean Air Act. Check "No" if you are not required to comply with Title V of the Clean Air Act. If you are not sure, check the "Unknown" box.

% Weight: If the regulated substance is in a mixture, provide the % weight of the regulated substance in the mixture.

Note: Only required for toxic chemical mixtures, not flammables.

Process Max. Quantity (lbs): Maximum quantity in pounds of the regulated substance or mixture in the process.

Process Description: Describe the process that uses the regulated substance. A "process" means any activity involving a regulated substance, including any use, storage, manufacturing, handling, or on-site movement of such substances, or combination of these activities. Any group of vessels that are interconnected, or separate vessels that are located such that a regulated substance could be involved in a potential release, is considered a single process.

IV. Sample CalARP Screening Worksheets

The following examples will assist facilities in completing their screening worksheets:

Sample Worksheet #1

Scenario:

A facility has a refrigeration system consisting of an expansion valve, evaporator, compressor, condenser, and receiver. It is a closed loop system. The system holds 15,000 pounds of anhydrous ammonia. The facility also has a blue print machine with four 150-pound interconnected cylinders of anhydrous ammonia. The facility has determined that they are not subject to Title V air permitting requirements.

Solution:

The threshold quantity for anhydrous ammonia is given as 10,000 pounds in Table #1 and 500 pounds in Table in #3. The CAS Number is 7664-41-7. There are two separate processes, the refrigeration system, and the blueprint machine. The ammonia in the refrigeration process is above the threshold quantity in Table #1. The ammonia in the blueprint machine process is above the threshold quantity in Table #3.

II. Regulated Substances Onsite				
Regulated Substance: <u>Anhydrous ammonia</u>	CAS # <u>7664-41-7</u>	CAA Title V Permit? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	% Weight: <u>NA</u>	Process Max. Qty. <u>15,000 (lbs.)</u>
Process Description (i.e. use, storage, manufacturing, handling, onsite movement, etc.) <u>Closed loop refrigeration system consisting of an expansion valve, evaporator, compressor, condenser, and receiver.</u>				
Regulated Substance: <u>Anhydrous ammonia</u>	CAS # <u>7664-41-7</u>	CAA Title V Permit? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown	% Weight: <u>NA</u>	Process Max. Qty. <u>600 (lbs.)</u>
Process Description (i.e. use, storage, manufacturing, handling, onsite movement, etc.) <u>Blueprint machine with 4-150 pound interconnected cylinders</u>				

California Accidental Release Prevention Program

IV. Sample CalARP Screening Worksheets

Sample Worksheet #2

Scenario:

A facility has three 1,000-gallon interconnected propane tanks used for heating purposes. The facility also has a 5,000-gallon tank of 10% hydrofluoric acid used in the manufacture of semiconductor chips. The partial pressure of the hydrofluoric acid in the tank is less than 10 mmHg. The facility does not know if it is required to comply with Title V air permitting requirements.

Solution:

Using 5lbs/gallon as the conversion rate for propane, there are 15,000 pounds of propane in the process. The propane is above the threshold quantity of 10,000 pounds in Table #2. The CAS Number for propane is 74-98-6. Fuels used onsite are currently excluded from preparing an RMP under Section 2770.4.1, Title 19 CCR. Because the hydrofluoric acid in the 5,000-gallon tank has a partial pressure lower than 10 mmHg, it would not need to be considered. There are 1,718 pounds (3 x 55 gallons x 8.33 lbs/gallon x 1.25) of hydrofluoric acid in storage. This is above the 1,000-pound threshold quantity in Table #1 and the 100-pound threshold quantity in Table #3. However, Table #1 specifies concentrations of 50% or greater of hydrofluoric acid and although Table #3 does not specify a concentration, the partial pressure of the solution is less than 10 mmHg. Therefore, the hydrofluoric acid will not require an RMP.

II. Regulated Substances Onsite				
Regulated Substance: <u>Propane</u>	CAS # <u>74-98-6</u>	CAA Title V Permit? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unknown	% Weight: <u>NA</u>	Process Max. Qty. <u>15,000 (lbs.)</u>
Process Description (i.e. use, storage, manufacturing, handling, onsite movement, etc.) <u>Three man folded 1000 gallon propane storage tanks used for on-site heating purposes.</u>				
Regulated Substance: <u>Hydrofluoric Acid</u>	CAS # <u>7664-39-3</u>	CAA Title V Permit? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unknown	% Weight: <u>10%</u>	Process Max. Qty. <u>1718 lbs</u>
Process Description (i.e. use, storage, manufacturing, handling, onsite movement, etc.) <u>Hydrofluoric acid used at a 10% concentration. Below 10 mmHg partial pressure.</u>

CalARP REGULATED SUBSTANCE DISCLAIMER/DEREGISTRATION FORM

This form is to be completed by facilities that no longer handle regulated substances and by facilities that have reduced their usage of a regulated substance below the threshold quantities in a process.

I. IDENTIFICATION

FACILITY ID # - Enter your 6 character Permit # on your Unified Program Facility Permit (UPFP). If you do not have a UPFP leave this blank.

BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA"- Doing Business As.

DATE - Enter the date (YYYYMMDD) the disclaimer was prepared.

BUSINESS PHONE - Enter the phone number, area code first, and any extension.

BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility. If the mailing address is different, complete #113- #116.

CITY - Enter the city or unincorporated area in which business site is located.

ZIP CODE - Enter the zip code of business site. The extra 4-digit zip may also be added.

BUSINESS OPERATOR NAME - Enter the name of the business operator who handles Cal-ARP, RMP issues.

BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.

MAILING ADDRESS - Enter the mailing address where business related correspondence should be sent, if different from business site address.

MAILING ADDRESS OWNER CITY - Enter the name of the city for the mailing address.

MAILING ADDRESS OWNER STATE - Enter the 2 character state abbreviation for the mailing address.

MAILING ADDRESS OWNER ZIP CODE - Enter the zip code for the mailing address. The extra 4-digit zip may also be added.

II. THE FOLLOWING REGULATED SUBSTANCES ARE NO LONGER HANDLED AT THE ABOVE SITE

1, 2, or 3. List the name of the regulated substance, and CAS Number. List the reason for discontinued use of a regulated substance, or the chemical that is not a Regulated Substance used as a substitute.

III. THE FOLLOWING REGULATED SUBSTANCES ARE HANDLED BELOW THEIR THRESHOLD QUANTITIES

1, 2, or 3. List the name of the regulated substance, and CAS Number.

TOTAL AMOUNT STORED ON SITE- the total quantity of the regulated substance onsite in all containers, tanks, vessels, and process equipment.

SIZE ON LARGEST STORAGE CONTAINER-the actual size of the largest storage container or tank.

SIGNATURE DATE - Enter the date that the document was signed (YYYYMMDD).

NAME OF DOCUMENT PREPARE - Enter the full name of the person who prepared the inventory submittal information.

NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the Signer's belief that **submitted information is true, accurate and complete.**

TITLE OF SIGNER - Enter the title of the person signing the page.

If your facility submits a disclaimer and is now or in the future subject to the RMP requirements, you will need to submit a new RMP and be subject to the RMP review process. The RMP will be considered for a new process and you will be prohibited from bringing the regulated substance(s) on site or increasing the quantity above the threshold until a complete RMP has been submitted.

¹ The exemption in Section 2770.2(b)(1)(B) regarding portions of a process where this regulated substance is handled at partial pressures below 10 mm Hg does not apply to this substance.

Note - Basis for Listing:

- a Mandated for listing by Congress.
- b On EHS list, vapor pressure 10 mmHg or greater.
- c Toxic gas.
- d Toxicity of hydrogen chloride, potential to release hydrogen chloride, and history of accidents.
- e Toxicity of sulfur trioxide and sulfuric acid, potential to release sulfur trioxide, and history of accidents.
- f This column identifies substances which may appear on Table 3. Table 3 may not have concentration limitations.

- 1 This column identifies substances which may appear on Table 1. Table 1 may have concentration limitations.
- 2 Substances that failed the evaluation pursuant to Section 25532(g)(2) of the HSC but remain listed pursuant to potential health impacts. The exemption in Section 2770.2(b)(1)(B) regarding portions of a process where these regulated substances are handled at partial pressures below 10 mm Hg does not apply to these substances.
- 3 These extremely hazardous substances are solids. The lesser quantity listed applies only if in powdered form and with a particle size of less than 100 microns; or if handled in solution or in molten form; or the substance has an NFPA rating for reactivity of 2, 3, or 4. Otherwise, a 10,000 pound threshold applies. The exemption in Section 2770.2(b)(1)(B) regarding portions of a process where these regulated substances are handled at partial pressures below 10 mm Hg does not apply to these substances.
